How an NPLify deal flows

Operations starts each step and Finance approves the controlled actions where the Lifecycle & Approvals document says so (never the person who initiated); money passes from sender to partner to receiver, and exceptions and the daily close hang off the side of the deal. The drawing is the quote-first flow, simplified: a collect-first deal enters at Collected and an estimate-first deal at Collecting (Lifecycle Figure 1); verification of a collection is an Operations step with no approval.
